PAGES 2 ENCLOSURES (NO. & TYPE) 25X1A

REMARKS

SOURCE 25X1X

25X1A 1. the Panzer Kaserne in Neubrandenburg (N 54/U 66) seemed to  
be occupied to capacity. The noise of troops drilling was heard from the  
billeting area and small groups of soldiers were seen receiving infantry  
field training in the vicinity of the installation. Local residents stated  
that no troops had departed from the installation. Three JS-2 tanks were  
observed at the drill field adjoining the billeting area, and JS-2 tank No  
432 was seen moving from the torpedo testing institute to the installation.

25X1C

2. On 11 May, a repair shop operated by 20 to 30 soldiers and guarded by 6 soldiers was still located in the torpedo testing institute. Ammunition boxes were piled at a concrete bunker which was guarded.
3. The Augusta Bad, surrounded by a board fence, seemed to quarter the personnel employed in the torpedo testing institute. Only a few soldiers were seen walking between the two installations. \*\*
4. The signal troop's quarters on the southeastern perimeter of Neubrandenburg was occupied by not more than 50 soldiers who wore black-bordered black epaulets. The soldiers were observed to have telephone equipment, wire reels and climbers.

25X1A

- \* the Panzer Kaserne is still  
believed to quarter the 413th Indep Pon Bridge Bn of the Second Gds Mecz  
Army and tank components of the 9th Gds Tank Div. 25X1A  
It is possible that the tank components may belong to the division's  
unidentified Gds Hv Tank SP Regt. 25X1A  
Although the  
vehicle numbers mentioned in the present report indicate the possibility  
that the artillery regiment of the 9th Gds Tank Div may also be stationed  
in the installation, it seems improbable because the vehicle numbers assigned  
to the regiment have been periodically reported from Neustrelitz. On the  
whole, the credibility of the present report is reduced by the multitude  
of numbering series, which, though belonging to the 9th Gds Tank Div, are

probably not all assigned to units in Neubrandenburg, and by the wrong  
specification of vehicle categories,

\*\* Comment. [REDACTED] is probably correct in concluding that the Augusta  
Bad quarters the personnel who operate the tank repair shop in the  
torpedo testing institute.
